

## IRN CCD2030 Kick-off 2024: combining cosmological data.

Contribution ID: 13

Type: **not specified**

### KIDS

*Tuesday, June 11, 2024 2:00 PM (40 minutes)*

The Kilo-Degree survey measures cosmic shear, and has been combined with galaxy clustering information. I will review our results and prospects, with particular attention to the probe combination and sky footprint aspects.

**Presenter:** Prof. KUIJKEN, Koen

**Session Classification:** What additional information cross-correlations between surveys bring.
